

THE **POLYLOK™ STOCK FENCE SYSTEM**

Designed by farmers for farmers

- Low cost fencing.
- Upgrades old fences
- Allows for Electrification
- Long life HD Polyethylene
- Fence lifts up for stock movement and trash removal
- POLYLOK adapts To all fence systems

POLYLOK™ STOCK FENCE SYSTEM

POLYLOK™ is a low cost, easy to use, professional fencing system. POLYLOK™ system products are “common denominator” products developed with farmers and rural fencing contractors in mind to make low cost, easy to install rural stock fences with superior user benefits.

The assembly of components shown below is the basic building block allowing you to install most fence types.

Install a fence to standard well proven configurations or to make up a fence just the way you want it. Other accessories allow you to adapt this basic assembly to most fence types.

Install the wires or mesh (both can be electrified) to normal strainer assemblies.

Have a look at Polylok™ from the ground up!

The “POST” - is a “C” shaped, galvanized, high tensile steel post with a durable, high density polyethylene plastic POST SLEEVE.

Steel C-POST is driven into the soil. The C-Post ends part way up, inside the MAXI POLY DROPPER or POLY GUARD. These posts may be supplied with extra tip coating.

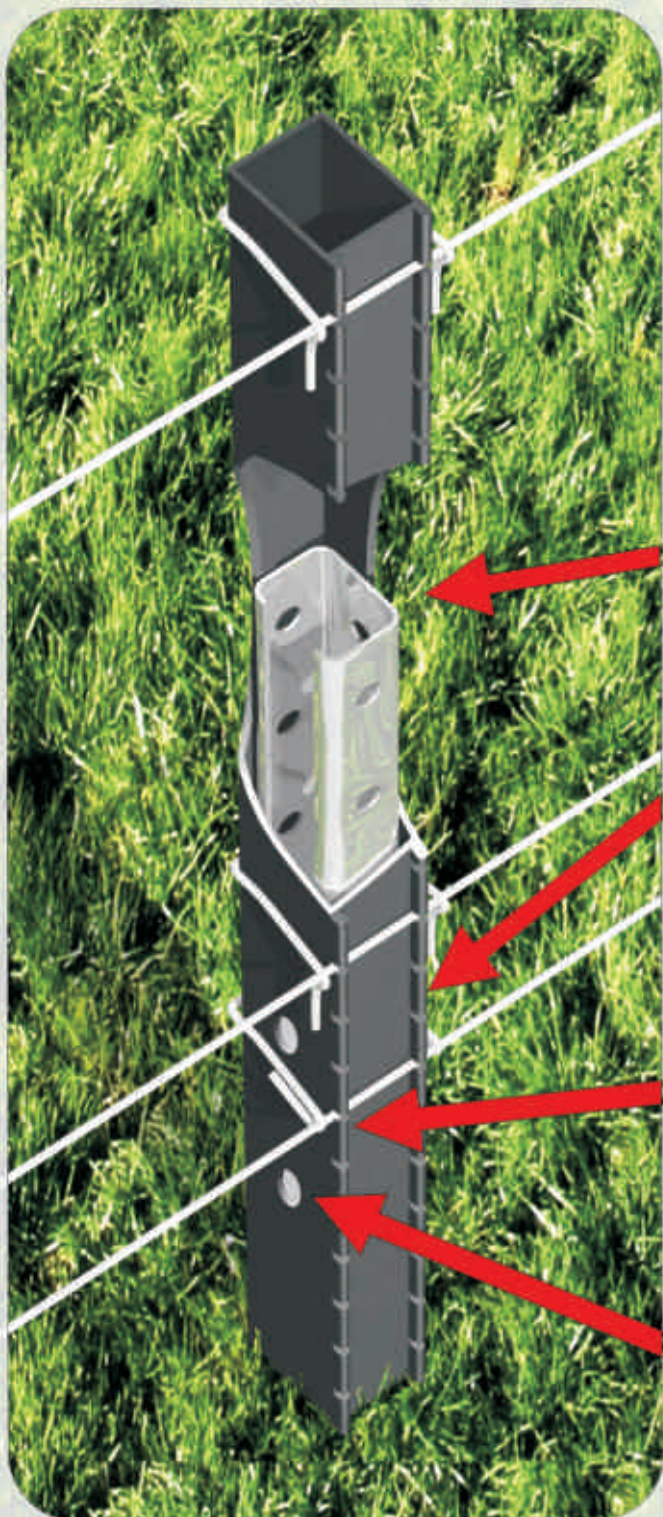

The MAXI POLY DROPPER (or GUARD), is dropped over the C-POST.

All guard type products have holes/notches to match POLY DROPPER spacers.

MAXI POLY DROPPER SNAP ON CLIPS are used to snap fence wires onto the grooves in the MAXI POLY DROPPER.

Clips can be easily bent back, as shown, for more secure attachment using POLY DROPPER Clip-tool.

Pin fence up or down using holes, if required.

Simple Hey?

POLYLOK™ STOCK FENCE SYSTEM FEATURES

The POLYLOK™ Stock Fence System uses a range of standardized yet unique fence components. These products easily assemble into a strong and durable fence with heaps of excellent features.

POLYLOK™ fence can be lifted

- **KEY FEATURE** - The fence can be raised to clear drift sand, trash, flood water or even fires.
- **COST EFFECTIVE** - Polylok™ fence is cheaper to buy, cheaper to install yet has far better features than conventional fencing.
- **UPGRADES OLD FENCES** - Use Polylok™ fence products on wires of old fences.
- **ELECTRIFY FENCES** - Polylok™ sleeved fences are always insulated and can be easily electrified. Even old wires or netting can be electrified.
- **ADAPTABLE FENCE PRODUCTS** - Polylok™ products adapt to a wide range of fence types, with new unique products and uses being constantly added.
- **LONGLIFE** - Polylok™ products have already outlasted most other fence products in real field trials.

Vermin fence using sloping POLYLOK fence products.

SMART POLYLOK™ PRODUCTS CAN ALLOW FENCES TO BE ELECTRIFIED

- **POLY DROPPER™** - poly fence wire spacers clip to existing fence wires - notched for clips.
- **MAXI POLY DROPPER™** - large poly fence wire spacers that fit over c-posts - notched for clips.
- **MAXI POLY GUARD™** - as above, except it has holes for clips that allow wire end movement. Whole fence absorbs animal impact.
- **STAR POLY GUARD™** - poly sleeves with holes for clips that allow wire end movement - fits over star type posts.
- **C-POST™** - strong galvanised steel posts, stand alone, or poly sleeved for electric or non-electric fences.
- **POLY SITER WIRE** - makes fence lines visible. Can be used instead of wire or is slit to snap over existing wires. Strains up tight.
- **POLY OFFSETTER** - clips to existing fence wires - can carry electric wires offset from the fence.
- **CLIP TOOLS** - fast clip attachment of fence clips.
- **POST DRIVERS** - pneumatic and manual fence post drivers.
- **AG-BAR** - galvanised steel C-section, supplied plain or with holes punched every 50mm up to 6m long.
- **SMARTRAIL** - white poly fence decorative rails and posts - a great

POLY OFFSETTERS clipped to existing wires to support electric offset wire.

YOUR IDEAS - Do you have any great ideas for new fence products, new fence applications or for improvements to our existing product? Contact us and let us know. We would be glad to work with you to make your fencing better. DM Plastics will gladly reward for good ideas.
